**Catalogue Reference codes:**

E	Excellent condition	Nearly new condition with original finish and no noted damage.
VG	Very Good condition	Small cracks in wooden parts, no repairs. Has minor loss to original finish. Ideal for collector's or display purpose.
G	Good condition	Minor cracks in wood parts, repairs may be needed for use, has substantial paint or finish loss. Minor rust damage on iron planes & tools. Ideal for users or those wishing to refurbish for collection.
F	Fair condition	Substantial cracks to wooden or metal parts. Most parts still intact, but may have had substantial repair or replaced parts. Major rust damage. Needs attention or repair prior to use. Good for parts.
P	Poor condition	Major damage or altered pieces. Has deep pitted rusting to iron & metal pieces. Good for parts use only, or major repair work.

**Cataloguer's note:** This list is a guide that contains our description of each piece. We used several tool references, guides and years of experience handling these tools to create these descriptions. However, many pieces are hand wrought for a particular purpose and no reference to their use exists. Several of the noted makers have had extensive research to determine the designated history. Thanks again to those all those involved in this extensive research of makers. Again special thanks to John Tannehill for the research on many of the blacksmiths working primarily in Pennsylvania.

“Rarity” is a very difficult attribute to determine, but we considered how often these pieces have come across our auction block in the past several years to make that distinction. This may not always be in agreement with all price or collector guides.

The conditional reference was done in a fashion that we felt described the quality or condition of each piece. Please refer to the chart above.

**Absentee bids:** We strongly recommend that anyone wishing to place an absentee bid *examine the item in person first*. If you choose to place an absentee bid based on the description in the catalog alone, without examining the item personally, you do so at your own risk. The tools are described in an as found condition. You are the final judge. NO RETURNS WILL BE ACCEPTED.

**Anyone wishing to place a bid with our auction firm must have either personally examined the tools during the preview times, or have made prior contact with our office staff at Horst Auction Center, (717) 738-3080.**
