**Cataloguer's note:** This list is a guide that contains our description of each piece. We used several tool references, guides and years of experience handling these tools to create these descriptions. However, many pieces are hand wrought for a particular purpose and no reference to their use exists.

“Rarity” is a very difficult attribute to determine, but we considered how often these pieces have come across our auction block in the past several years to make that distinction. This may not always be in agreement with all price or collector guides.

The conditional reference was done in a fashion that we felt described the quality or condition of each piece. Please refer to the chart above.

**Absentee bids:** We strongly recommend that anyone wishing to place an absentee bid *examine the item in person first*. If you choose to place an absentee bid based on the description in the catalog alone, without examining the item personally, you do so at your own risk. The tools are described in an as found condition. You are the final judge. NO RETURNS WILL BE ACCEPTED.

*Anyone wishing to place a bid with our auction firm must have either personally examined the tools during the preview times, or have made prior contact with our office staff at Horst Auction Center, (717) 738-3080.*
